

Broadcast Messaging

The most efficient operations teams are able to communicate with tenants, vendors and staff instantly, from any location. In an emergency situation, or just as a daily communications tool, Building Engines Broadcast Messaging enables you to quickly and easily create, send and save important communications for all your key contacts- eliminating the need to make repetitive announcements, print unnecessary signage and spend time searching for contact information.

Mobile Tenant Communications

- ▶ Message or emergency broadcast to pre-defined and customizable groups - via text, email, and phone - through the mobile app, BE-Mobile
- ▶ Post messages and photos instantly to BuildingConnect property websites and online tenant portal from any mobile device or tablet

Broadcast Messaging

Timely, Accurate and Simple Communications

- ▶ Create custom contact groups for tenants, employees, and vendors to ensure the right people get the message
- ▶ Pre-save emergency broadcast templates and contact lists to reduce communication time during critical situations
- ▶ Track communication history by recipient and utilize “read receipt” functionality to confirm important messages have been received
- ▶ Attach documents and photos to messages and post instantly to your BuildingConnect website or tenant portal
- ▶ Enjoy the convenience of tenant, employee and vendor data that is automatically updated in real-time and seamlessly integrated into one central location
