Michael Weber				

In an emergency situation, or just as a daily communications tools, the *Broadcast Communications Manager* enables you to quickly and easily create, send and save communications with tenants, employees or vendors in your building or portfolio.

Eliminate the need to make repetitive announcements, print unnecessary signage, and look up contact information.

## Key Benefits

- Create custom contact groups for tenants, employees, and vendors to ensure the right people get the message.
- Pre-save emergency broadcast templates and contact lists to reduce communication time during critical situations.
- Track communication history by recipient and utilize "read receipt" functionality to confirm important messages have been received.
- Attach files from the Document Manager.
- Enjoy the convenience of tenant, employee and vendor data that is automatically updated in real-time and seamlessly integrated into one central location.

## Communications Made Easy

“Every tenant in your building will feel well informed and engaged by the property management staff with this proactive communications tool.”

- Tenant Coordinator
