

## Fire & Life Safety Manager

Should an emergency arise, everyone in your facility, from occupant to first responder, will have the information they need to adequately respond to and manage the situation.

### Our Fire & Life Safety Manager

safeguards your property, occupants and staff and ensures adherence to compliance requirements with automatic reminder notices and escalation notices if requirements are not met. Manage and maintain all required documentation from one central location.

### Key Benefits

-  Automate Fire & Life Safety event reminders and set escalations for missed events
-  Manage all Fire & Life Safety documents and keep records secure with Tier 1 off-site data storage
-  Create and maintain specified Fire & Life Safety groups such as Building Fire Wardens, Mobility Impaired, Vendor Emergency Contacts, etc.
-  Reduce response time during emergencies and ensure that critical communications reach key responders and managers
-  Minimize exposure to potential liability and reduce incurred losses
-  Improve regulatory compliance with full-featured, flexible reporting and audit trails
-  Improve occupant safety, service and communication

### Did You Know?

Studies show that individuals who participate in drills and receive emergency training react faster and with better decisionmaking than those without training.
