# Fire & Life Safety

Emergency Preparedness in commercial real estate requires, planning, preparation and communication. When an emergency happens in your property, make sure the key people have access to the information they need, you can reach people quickly and document it all.

Building Engines Fire and Life Safety module safeguards your property, occupants and staff by promoting training and emergency preparedness, moving fire and life safety documentation into a single, online database for easy reference, and ensuring adherence to compliance requirements through automatic reminders and escalation notifications.

## Be Prepared

- Schedule emergency readiness trainings and set reminders and escalation notifications for missed events.

- Create and maintain specified fire and life safety contact groups such as Building Fire Wardens, Mobility Impaired, Vendor Emergency contacts, First Responders, etc.

- Auto-audit the user information of group members to ensure all required fields have been filled and that information is up to date

- Easily store, view and download Fire & Life Safety (FLS) documents, including photos or videos

BuildingEngines

# Fire & Life Safety

## Be Responsive

▶ Send critical messages to pre-defined recipient groups as soon as an event occurs via email, SMS, or fax.

▶ Instantly download and share preparedness documents and response plans.

## Reduce Liability Exposure

▶ Maintain all emergency preparedness documents in a central online database

▶ Back-up and secure records in a Tier 1 off-site data facility

▶ View open and historical events in a building to illustrate compliance
