

# Better or Worse?

Healthcare organizations that have implemented Building Engines in their facilities achieve superior results through increased **visibility**, **reduced repair costs**, increased **usable life** of equipment, and by making it **easier to meet** regulatory tracking and reporting requirements.

**BuildingEngines**  
Optimizing Property Performance

## Who uses Building Engines?

Golden Living | Avalon Health | Elderwood Healthcare | UHS Pruitt  
Noland Health Services | Medical Facilities of America | Adventist  
Health | Hebrew Senior Life | Arbors Retirement | Belmont Village

## A Care Plan for Your Facilities

Building Engines provides healthcare facility operators with the tools, expertise, best practices advice, and information they need to gain critical visibility into their facility operations functions.

Driven by a service first philosophy, Building Engines is designed to meet the needs of your unique organization – giving you the best process functionality, highest level of usage, and best data collection possible – delivered rapidly and comprehensively by the Building Engines team.

Building Engines provides a cost-effective solution that generates immediate results for every facility in your organization.

- **Staff & Patient/Resident Service Requests**
- **Preventive Maintenance Tasks**
- **Inspection Tasks & Procedures**
- **Accreditation Reporting**
- **Insurance, Local, State Code-based Inspections**
- **Risk & Liability Management**
- **Eliminates costly manual systems and redundancies**

**Building Engines has made us much more efficient!**

- Deborah Williamson,  
Area Manager, Golden Living

## Case Study: Golden Living

Golden Living is one of the nation's largest skilled nursing and assisted living organizations with over 350 facilities around the country. Its Chief of Operations knew that the company's existing maintenance processes, infrastructure, and scheduling capabilities were wildly inefficient and impossible to track.

After evaluating all of their options they decided to implement Building Engines in all of their facilities. Since completing deployment, Golden Living has significantly improved:

- **Maintenance scheduling**
- **Reduced its equipment repair costs**
- **Increased the usable life on its equipment**
- **Provided greater visibility into its maintenance operations activities**
- **Increased the overall return on its assets.**

Building Engines also helped facility maintenance directors to quickly and easily prepare their reports for surveyors, better manage their maintenance schedules, and avoid equipment and maintenance related liability fines and charges.

Hindsight is 20/20, now  
**Visibility** into your  
facility operations is too!
